

Stock-Outs Killing You?

Are You Experiencing?

High total inventory yet frequent stock-outs of fast movers?

Losing customers because of stock-outs?

Excess & Shortages at time same time for products across the supply chain?

Low inventory turns?

July 11-12, 2017 Taj Ambassador, New Delhi

July 18-19, 2017 Taj Blue Diamond, Pune

Learn how to eliminate stock-outs without increasing total inventory.

Application of Theory of Constraints for Retail & Distribution.

What to Change?

Problems cannot be solved at the same level of thinking that created it. Hiring the best talent, investing in latest technology or simply putting in more energy to push cannot not solve chronic problems.

Our current problems are symptoms of deeper issues – related to management methods, systems and measurements.

Learn TOC's proven practical method of Dynamic Buffer Management (DBM) to improve inventory turns significantly.

Who should attend:

Business Owners, CEOs, Retail Heads, Operation heads, Production heads, Plant heads, Supply Chain Professionals, Materials Heads, Planning Heads.

Investment:

Rs.50000 + 15% service tax per participant.

Workshop fee includes course material, refreshments and lunch during the workshop. Does not include accommodation.

Send you nominations to Rakesh.

Credit card payment facility available.

Stock-Outs Killing You?

Theory of Constraints Applications Worskhop for Retail & Distribution

July 11-12, 2017 Taj Ambassador, New Delhi

July 18-19, 2017 Taj Blue Diamond, Pune

Facilitator

Manu Raj is one of the best TOC trainers in India. He has over 23 years of rich multi-industry experience.

He is a Theory of Constraints International Certification Organization (TOCICO) certified expert. He is an expert in improving Profit, Free Cash Flow & ROCE of companies by an order of magnitude in a short span of time through application of Theory of Constraints (TOC). Prior to starting Bottomline Matter he worked with companies like Accenture, TVS Electronics, Greaves Cotton. He has worked with clients in Manufacturing, Healthcare, Project Management & Services.

He is an associate of Goldratt India.

About Theory of Constraints

Theory of Constraints (TOC) is a Management Philosophy invented by Dr. Eliyahu M. Goldratt, an internationally recognized leader in the development of new business management concepts and systems, writer of the best-selling business book - THE GOAL. Theory of Constraints provides a set of holistic processes and rules, all based on a systems approach that exploits the inherent simplicity within complex systems through focusing on the few "leverage points" as a way to synchronize the parts to achieve ongoing improvement in the performance of the system as a whole. TOC philosophy has been used in Manufacturing, Distribution, Financial Services, Health, Defense, Government, Education, Social Services
